

A joint inter-agency collaboration between UNFPA, UNESCO and UNODC in Lebanon was launched in November 2020 in response to the Beirut Port Explosions in 2020 through engaging 15 partners to support, mobilize, and empower youth-led initiatives and efforts for the community's response and recovery.

UNFPA's 5 partners endeavored for finding innovative and sustainable solutions for concerns, problems and challenges as a result of the explosion and for empowering young people to be able to take decisions, to influence their peers, to make a difference as well as to contribute to social change in their respective communities.

Targets achieved

212 young people engaged and empowered

Males
47%

Females
53%
